

Barriers: Fencing Options

Fences can be placed at the top of a Keystone wall with fence posts placed behind the Keystone units. The choice, location, and compliance with local codes of the appropriate fall protection system, is the responsibility of the owner and site engineer. Follow these procedures for proper installation of fence posts with Keystone walls.

1. Install the Keystone wall per general installation instructions.
2. Fence posts positioned behind the Keystone units may be installed and anchored using a variety of installation methods.

E:8

- Fence post placed at least 3-feet behind wall face shall extend a minimum 2-feet in the ground.

E:10

- The rigid sleeve or form should be placed during the wall construction at the horizontal location. Do not auger through the geogrid after wall construction.
- Place 3-4-feet (min. depth) of sleeve or form passing through a minimum of two layers of geogrid when placing sleeve directly behind unit.
